

# MonoCart™

## Adjustable Floor Mounted Finishing Conveyor

### MonoCart

Richards-Wilcox MonoCart features a floor-mounted monorail conveyor track complemented with two top guide rails for cart adjustability for finishing applications. Rail adjustment segments are located wherever a tight tolerance operation is required such as robotic painting or load/unload areas. Specially designed carts support loads up to 300 pounds and have 8 smooth operating wheels that provide vertical and lateral stability for the parts being finished.

- Monorail Conveyor with adjustable guide rails
  - Rails adjust horizontally and vertically to increase cart stability
  - Adjustable segments located on 20" intervals
- Medium-Duty applications up to 300 lbs per cart
- 6" Chain Pitch for greater loading capacity
- MonoCart smoothly handles vertical inclines and declines up to 15 degrees
- Index rotation and spin type rotation are available
